

Innovation & Accelerated Learning Paths

Get your workforce up-to-speed 30-50% faster with this innovative approach to training.

Learning Paths™ have been proven to increase profits, productivity and performance. A Learning Path is defined as the entire sequence of events both formal and informal that an employee needs to learn to perform independently at a high level of proficiency.

Over 400,000 employees in 400 functions across 7 countries have successfully used Learning Paths to improve their organization. Intuita works in partnership with Learning Paths International. For more information on how they have been applied please visit www.learningpathsinternational.com.

Virtual University & Training Center

Intuita's E-Learning programs are geared to fill in the gaps for the common training areas your business or organization may need. They include a complete Management & Employee Development Program that can serve as a virtual training department using externally hosted LMS systems.

A full range of standard health and safety training with certificates of completion, including on-line Certification Programs, is available. Your employees don't need to leave your workplace and you can save money on these high quality competitively priced modules. No additional expensive technology is required and courses are easy to use. Customized e-learning modules can be developed to suit your needs.

Grassroots Innovation

Ideas enthusiastically applied

Consulting

At Intuita we can help any company or organization learn how to make innovation pay off. Innovation doesn't need to be elaborate or expensive. There are countless ways to be more innovative. Sometimes innovation can be found in the most unlikely places. We will find the ways that best suit your organization, goals and budget.

Our areas of expertise include:

- Developing an Innovation Path for your business or organization
- Building a more intuitive organization and developing skills
- Conducting training in innovation & creative power for groups and teams
- Developing customized training approaches

The "I" of Innovation -

Is our short animated film that illustrates the relationship between generating innovative ideas and personal creative power.

Arupa Tesolin – Speaker

Arupa is a respected speaker, trainer and Innovation Coach who has authored two breakthrough books on business intuition and innovation.

With an enlightened perspective that balances learning & scientific elegance, Arupa brings her audiences invaluable know-how on how to effectively tap new sources of innovation capital and maximize their return on imagination.

The “I” of Innovation

I am, therefore I innovate.

Spark - Raise Your Mind to the Power of Infinity and Create Anything
by Arupa Tesolin

About: An idea is the first step in creating anything. Grasp your creative legacy as you learn the universal principles behind the hidden science of creating, how to source from internal creative power based on infinite possibilities, not limitation. Learn how to travel the path from the unimaginable to the imaginable, to the conceivable, and finally the created. This practical guide will forever alter your relationship with the universe of mind and matter.

Imagination begins where the brain ends. The following Innovation Workshops help groups and teams develop their creative power and begin to actively innovate.

The popular business book
“Ting! - A Surprising Way to Listen to Intuition & Do Business Better”
by Arupa Tesolin, rated 4 Stars (the highest) by Training Magazine, U.S.

About: Ting! is a story about what happens to a young sales manager when intuition wakes up his life. Through Tony's journey, readers begin to discover how their own Ting's bring the power of intuition to their lives and workplaces. It's also a learning resource and conversation-starter that shows a clear business case for the value of intuition to anticipate change, recognize opportunity, strengthen communication and people skills, improve decision-making and generate innovative solutions.

Intuition and creativity are closely linked. Intuition is the source of imagination. Both intuition and applied imagination are needed in order to innovate. The following Ting! Workshops help teams and groups develop and apply their intuition smarts using easy-to-learn Ting! Tools that they can apply in everyday life and business settings.
